

## BOSCH AUTOMOTIVE STEERING

Year	2016
Place	VENDOME - 41 - France
Sector	Automobile
Field	Test equipment
Type	Sound measurement booth
Price	50 000 €

Bosch Automotive Steering in Vendôme wished to **renew and improve their acoustic test booth** for steering columns.

Drawing on its experience, dB Vib Ingénierie was able to propose a test booth **providing the acoustic performance** requested:

- Background noise less than **20 dB(A)**
- **Vibratory separation** of the room
- Reverberation time less than **0.2 seconds**.

dB Vib designed and installed the booth in a restricted space while ensuring the accessibility and ergonomics for the operator performing the tests.
