

INSA

Year	2014
Location	LYON - 69 - France
Sector	Research
Field	Test facilities
Type	Acoustic treatment
Amount	340 000€

During the realisation of the semi anechoic room, dB Vib Ingenierie was also in charge of the realisation of the **acoustic and vibration isolation of 3 test motor benches**.

With a complete **acoustic study realized by dB Vib Consulting**, dB Vib Ingenierie made the acoustic treatment of the 3 benches and the sizing and installation of **spring elements** for the vibration isolation of motors.

dB Vib Group has been acting in this **project since the conception to the acceptance measure tests**. For the customer it is an advantage to have only one contact during the project.

dB Vib Group is here to help customer to find best solution thanks to our expertise.
