Currently expanding and right in the city, ARAYMOND company was having **noise problems** by the closest residents.

Very concerned, our customer asked dB Vib to **diagnose** the disturbing sources, then to **propose sound insulation solutions ensuring that the regulatory noise levels are met** by residents. This operation allows dB Vib to implement all its acoustical skills chain and to solve the customer issue.

For ARAYMOND, it gave the **insurance** of a complete methodological approach and **the satisfaction guarantee** of their neighbours quickly.
