Place	ENVERMEU - 76 - France			
Sector	Energy			
Field	Soundproofing			
Type	Mural acoustic treatment			
Price	1k€	10k€	100k€	1M€

Within the framework of the **ENEDIS Envermeu substation contract**, PIAZZA Batiment called in dB Vib Ingénierie for the acoustic lot.

It was thanks to first successful joint venture for another substation that Piazza entrusted us with the **supply and installation of acoustic cladding** on the firewalls around the transformers.

DB Vib Ingénierie **devised and sized solutions for limiting the acoustic impact** of the treatment stations on homes in the neighbourhood.
