Place	GRENOBLE – 38 - France			
Sector	Building			
Field	Soundproofing			
Type	Refrigeration unit treatment			
Price	1k€	10k€	100k€	1M€

RIBIERE contacted dB VIB to assist generally in the **respect of the acoustic requirements** during the construction of an **industrial building**.

dB Vib first performed the necessary calculations notes and then **served as a relay** between RIBIERE and the acoustic inspection office of the project to obtain validation of the solutions. dB VIB then **sized a solution** coupling screens and silencers to deal with the heat pump and the all the building air extractors.

Finally, dB Vib **constructed this installation** favouring a modular solution for a short intervention on the site. dB Vib supported the **whole of the noise issue** for the project in order to provide a comprehensive turnkey answer.
