

## VEOLIA

Year	2017
Place	MAISONS LAFFITTE - 78 - France
Sector	Environment
Field	Soundproofing
Type	Housings on pumps
Price	1k€    10k€    100k€    1M€

SIAAP is modernising and enlarging its "Seine Aval" plant which has become the **2nd largest water purifying plant in the world**.

In its environmental approach, SIAAP's programme included reducing some noise levels that were higher than the regulation levels in the plant. dB Vib proposed a solution enabling **acoustic improvements from 10 to 25 dB** to be obtained by specially creating an anodised aluminium variant of its **EKOFLEX housings**.

This enabled us to supply, **for 42 pumps, acoustic housings** respecting the criteria for **corrosion protection**, while proposing a **solution that was less costly and equally efficient** as if it had been made from stainless steel.
